Daiana Beltrán

Data and Business Intelligence Analyst

Neuquén, Argentina | daianabeltran@gmail.com | linkedin.com/in/daiana-beltran | daiana-analytics.github.io | github.com/daiana-analytics

Profile

Data analyst trained in SQL, Power BI and Python. I come from clinical psychology, where I learned to interview, assess needs and explain complex conclusions simply. I start from the business question: I check data quality before analyzing and close with a concrete recommendation. My main project analyzes Vaca Muerta oil production with public data. Looking for Data Analyst, BI Analyst or management control analyst roles, remote or hybrid.

Skills

Data	SQL (SQL Server, MySQL): queries, joins, aggregations and views. Power Query.
Analysis	Python (pandas, SciPy, Matplotlib), in training. Excel: pivot tables, lookup functions, macros and dashboards.
Visualization	Power BI, DAX, star schema. Interactive web dashboards.
Methods	Data quality auditing, KPI definition, Scrum and Kanban.
Applied AI	AI assistants and agents (Claude Code) to speed up analysis and automate tasks.

Projects

Well decline in Vaca Muerta — 2026

Python, pandas, SciPy, Power BI. Public data from Argentina's Energy Secretariat. daiana-analytics.github.io

- Analyzed monthly production of 1,974 unconventional wells started from 2016 on: on average they decline 69.8% in the 12 months after peak.
- Audited the data by separating shut-in wells from depleted ones using effective production time (12.1% shut in at the end), to avoid overstating decline.
- Fitted the industry-standard Arps model: without bounding its b parameter it overestimates 15-year cumulative production by 16%. Validated the model with backtesting.
- Presented results in Power BI and an interactive web dashboard with operator filters and a map of 3,417 wells.
- In progress: moving the cleaning and filtering of the raw dataset (about 140 MB) to SQL.

AI agent for administrative work — 2025 – 2026

Claude Code. In development.

- Designed an agent with configured memory and skills to prepare the next day's schedule and draft replies to frequent inquiries for an independent practice.

Experience

Clinical Psychologist, independent practice — 2025 – present

Neuquén, Argentina

- Needs assessment and case analysis to define work plans.
- Process follow-up and organized record-keeping of confidential information.
- Clear communication of conclusions to very different people.

Education

Data Science for Business. Python, applied statistics and Machine Learning for business — 2026, in progress

Smart Excel, SMARTpro Academy. 60+ hours — 2026

Professional Communication and Public Speaking, OPI 2.0. 20 hours — 2026

Data Analytics Bootcamp, Unicorn Academy. 300 hours: SQL, Power BI, Python, ETL, Azure — 2024 – 2025

Agile methodologies certifications (Scrum), Educación IT

B.A. in Psychology, Universidad de Flores — 2019 – 2024

Public Accounting, two years completed, Universidad Nacional del Comahue — 2016 – 2018

Languages

Spanish: native. English: beginner, currently studying.
